

InstaGate EX2™

Firewall with a futureSM

If you are using a broadband connection without a firewall you're extending an open invitation for hackers to violate your network and to walk away with confidential client lists, financial records or other business-critical data. Many hackers are harmless. Others aren't so innocent. They're bent on inflicting pain on businesses like yours. Sometimes for profit, sometimes just for fun.

Slam the door in the face of hackers with the InstaGate EX2 Internet security appliance from eSoft.

InstaGate EX2 not only protects your valuable business data, it enables you to realize the savings and convenience of VPN technology by connecting branch offices and remote workers to your corporate network securely and inexpensively.

A Firewall and VPN appliance for today

InstaGate EX2 is a bulletproof firewall with virtual private networking (VPN) that solves the Internet security demands of today's businesses. Featuring a sleek chassis the size of a laptop, InstaGate EX2 sets the benchmark for functionality, usability and value.

Easy to install and able to support 10 to 250 users, InstaGate EX2 is virtually maintenance-free. It is extremely reliable and is backed by world-class technical support.

Engineered for the future to prevent hardware upgrades

What really sets InstaGate EX2 apart is its extensible design. Engineered with the future in mind, InstaGate EX2 not only meets your immediate firewall and VPN needs but allows you to instantly enable business applications and services as needed. InstaGate EX2 grows with you—expanding up to 250 users—with no boxes to swap or technology to discard.

Revolutionizing the implementation of network software

Business applications and services called SoftPaks™ are delivered via a patent-pending software distribution process managed entirely over the Internet. SoftPaks such as anti-virus protection, web-filtering, groupware and more can be added instantly with the click of a mouse, forever eliminating the hassle of installing, evaluating and maintaining server software.

And because SoftPaks are delivered via the Internet, users are ensured up-to-date server software with automatic notification and one-click installation of software updates. This means you will never need to surf vendor web sites in search of the latest updates and patches ever again.

Key Features

- Firewall
- Caching Web Proxy
- Remote User VPN
- Remote Office VPN
- SoftPaks
- Upgradeable to 250 Users
- 1U Chassis, Rack Mount optional
- Field-Proven Reliability

Available SoftPaks™

- Anti-Virus
- Firewall Policy Manager
- Internet Server
- Joydesk
- Modem Communications
- PacketHound
- Security Check
- SiteFilter
- SmartReports
- SpamFilter
- Webmail

For a complete listing of SoftPaks go to www.esoft.com/products/softpak.cfm

InstaGate EX2™

Firewall with a futureSM

Technical Specifications

- 566MHz Intel® processor
- 1U height - 1.7 x 11.5 x 9.25" / 4.3 x 29 x 23 cm
- LCD and keypad
- 10.2 GB HDD
- 64 MB RAM
- Dual Ethernet ports (10/100 Mbps)
- 1 local printer port
- 5 lbs / 2.3 kg
- 9 status LEDs
- 100-240V AC, 47-63Hz, 60W supply
- DMZ Ethernet port (optional)
- 56K v.90 Modem (optional)
- EuroISDN (optional)
- V.35 Serial Interface (optional)
- 2 DB-9 RS-232 serial ports

Secure.

With InstaGate EX2 you can rest assured that your firewall will keep hackers out of your LAN and the VPN will let the right people in. With a transparent HTTP proxy server, stateful inspection and packet filtering firewall technology, InstaGate EX2 slams the door in the face of network vandals—preventing unauthorized network entry and denial-of-service attacks. Remote office (IPsec) and remote user (PPTP) VPN eliminates leased and dial-up line costs, making it possible for remote workers and branch offices to connect to a corporate network securely and inexpensively.

Extensible.

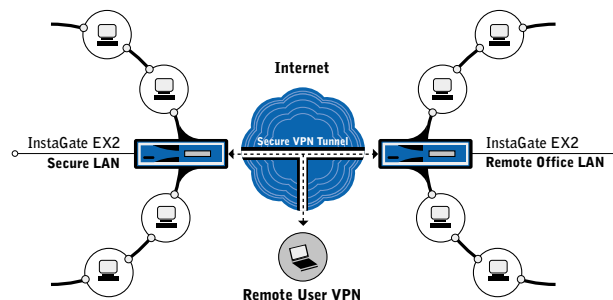

As your business needs grow and become more sophisticated, InstaGate EX2 readily accommodates, delivering business applications and services with the click of a mouse, preventing costly hardware swap-outs.

Unbeatable value.

InstaGate EX2 is priced the same as many single-function firewalls. Unlike the competition, InstaGate EX2 comes standard with remote user and remote office VPN. The extensible architecture also allows you to pay only for the services you need, when you need them.

Reliable and simple to use.

InstaGate EX2 requires five easy steps for a complete setup and, in most instances, is operational in less than 30 minutes. It supports most broadband and dial-up Internet connections. All setup and management is done through a simple web browser interface. Most importantly, once installed, you can depend on its field-proven reliability.

The InstaGate EX2 firewall keeps hackers out of your LAN, and the VPN lets authorized users in.

Technical Features

Firewall

- Transparent HTTP Proxy Server/Cache
- User Authentication and Access Control
- Network Address Translation (NAT)
- Stateful Inspection Packet Filtering
- VPN Forwarding
- Prevents spoofing, scanning, and denial of service attacks

Management and Usability

- Web Browser Management (Netscape 4.7+ or I.E. 5.0+)
- User Account Management
- On-Line Software Updates
- On-Line Subscription Management
- 5-Step Setup Wizard
- Client CD (includes browser software)
- 25-User License (upgradeable to 50, 100, 250)
- LCD and keypad

Remote User VPN & Remote Office VPN

- 20 Mbps average aggregate throughput
- Point to Point Tunneling Protocol
- MPPE (40 & 128 bit)
- MS-CHAP v2
- IPsec
- IKE & Manual Key Management
- 3DES Encryption
- ESP Tunnel Mode
- MD5 & SHA Authentication

Network Management

- DNS Forwarding
- DHCP Server
- DHCP Client
- PPPoE Client
